# STOP FIRE

## O OBVIOUS DANGERS

- **Take extra care smoking if you are drowsy, taking prescription drugs or if you have been drinking. It's too easy to fall asleep and not notice that a cigarette is still burning.**
- **Don't smoke in bed. It's too easy to fall asleep and set bedding on fire.**
- **Always use proper ashtrays.**
- **Make sure when you put out a cigarette, it is really out.**
- **Take responsibility and keep matches and lighters away from children.**
